However, classical physics led to the Rayleigh-Jeans law, which, as shown in the figure, agrees with experimental

results well at low frequencies, but strongly disagrees at high frequencies. The course was non-calculus-based, utilizing algebra and basic trigonometry to solve various physics problems. AP Physics B was divided into five different sections: Newtonian Mechanics, Fluid Mechanics and ... INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...
